EMPLOYMENT

Site Reliability Engineer — Jul. 2026 · Oct. 2026 · 3 months
Google
Munich, Germany

Skills: C++ SQL AI agents

· Developed RPC endpoints within existing binaries to improve data pipeline observability, enabling self-service debugging and diagnosis of probe configuration issues.
· Built an agent skill wrapper to streamline automated debugging workflows, increasing successful automated debugging rates by 97%.

Associate Software Engineer — Jun. 2025 · Sept. 2025 · 3 months
Google
Zurich, Switzerland

Skills: Artificial Intelligence · Python · SQL

· Built an AI system that translates natural language into SQL, using Retrieval-Augmented Generation (RAG) variants to map user intent to relevant database schemas, so users can query data without any knowledge of the underlying structure.
· Reduced errors and hallucinations by adding query validation checks and enriching the model with targeted schema context, improving the correctness and reliability of generated SQL.

Data Engineer — Jun. 2024 · Sept. 2024 · 4 months
Esperanto Technologies
Barcelona, Catalonia, Spain

Skills: Python · C++ · Artificial Intelligence · Machine Learning

· Ensured correct execution of Mixture of Experts (MoE) models on company-designed chips.
· Optimized performance via quantization and sparse execution; performed statistical analysis on gating.

Data Scientist — Jul. 2023 · Abr. 2024 · 10 months
Science4Tech
Barcelona, Catalonia, Spain

Skills: Python · SQL · Data Visualization · Supervised Learning

· Analyzed administrative, public, and clinical patient data for oncology clinical trials.
· Built machine learning models for trial optimization, risk monitoring, and efficiency prediction.

EDUCATION

Spanish Scientific Baccalaureate & International Baccalaureate — Sept. 2020 · Jun. 2027
INS Jaume Vicens Vives
Girona, Spain

· Spanish Scientific Baccalaureate Grade: 13.167/14 & International Baccalaureate Grade: 40/45
· One of the state schools participating in the CiMs-Cellex excellence track; students complete both the Spanish Scientific Baccalaureate and the International Baccalaureate with rigorous science-mathematics focus.

Bachelor's Degree in Data Science and Engineering
Bachelor's Degree in Biomedical Engineering — Sept. 2020 · Jun. 2027
CFIS - Polytechnic University of Catalonia
Barcelona, Spain

· Highly selective double-degree centre for high-ability students; admission via exam; allows earning two official UPC bachelor's degrees in up to 5 years.

PROJECTS

Glyphs · Typography Classification [#] — Skills: Docker · Sveltekit · Pocketbase · Ngnix

Developed a full-stack web application utilizing Docker, SvelteKit, and PocketBase to classify typographies

Tripmates · AI Agent: Awarded 1st Place in HackUPC 2025 [#] — Skills: Pydantic · Python · API knowledge

Awarded 1st place at HackUPC 2025. Engineered an AI agent that integrates group preferences to recommend travel destinations and plans, incorporating APIs for flights, accommodations, and events

Datathon Web Development [#] — Skills: Docker · Sveltekit · Pocketbase · HTML · Javascript · CSS

Led the development of a full-stack web application using Docker, SvelteKit, and PocketBase, ensuring seamless containerization and state management.

Outfit Generator: Awarded 1st Place in Datathon 2023 [#] — Skills showed: Python · C++ · SQL

Secured 1st place: Datathon FME 2023. Developed a Python web application that generates fashion outfits using images from the Mango database, with a C++ entropy minimization algorithm for optimal combinations.

VOLUNTEERING

UP+C Integration Bee [#] — Apr. 2023 · Present
Lead Organizer & Problem Setter

· Organize and design problems for a single-variable integration contest inspired by MIT's Integration Bee, held at UPC.
· Coordinate rounds (anonymous & public) and manage logistics for ~60+ student participants.

Associació d'Estudiants de Dades [#] — Jun. 2024 · Present
Full-stack Developer

· Develop and maintain web platforms for events and activities of the student data science association at UPC

Advanced Informatics Olympiad Course [#] — Jun. 2023 · Ago.2023
Competitive Programming Instructor

· Instructed high school students in advanced programming topics to prepare them for competitive programming contests.

ACHIEVEMENTS

1st Place	Hack UPC (2025)
1st Place	Datathon FME (Nov 2023)
3rd Place	HP CodeWars Barcelona (Mar 2022)
Leagues of Code Scholarship	Algorithm Programming (2022)
Represented Spain	International Informatics Olympiad by teams (2021)
Bronze Medal	BarcelonaTech Math Contest (Feb 2021)
